

Environmental Policy

The purpose of this document is to express to all stakeholders NZ Bushpest Ltd's (NZBP) commitment to improving its environmental performance. Furthermore, it provides guidance for all people working on behalf of NZBP on how they should behave regarding the company's environmental performance.

NZBP is a small business that designs bespoke solutions for monitoring, controlling or eradicating pests. The availability and variety of resources and equipment, and experience of our employees ensures we can provide a wide range of solutions.

The mission of NZBP is to safely, professionally and efficiently carry out contracts from government agencies to protect and conserve New Zealand's natural and historic heritage by effectively controlling non-native species.

To achieve our environmental objectives we commit to the following:

1. Continual improvement in our environmental performance
2. Protection of the environment which includes the prevention of pollution
3. Complying with New Zealand's Health, Safety and Environmental legislation

To achieve this we regularly assess our environmental risks, design projects to manage those risks, and implement controls. During the year, we monitor the success of our projects seeking to improve them where we can.

It is the responsibility of all people working on behalf of NZBP to help achieve the above goals.

monitor control eradicate.
